Le Phung Ha

Software Developer Intern

034 737 2061 lephungha1203@gmail.com Github: ChykenHa (Lê Phùng Hà) Hoa Khanh Nam, Da Nang, Vietnam

CAREER OBJECTIVE

Aspiring **C# Developer** seeking an internship position to apply academic knowledge, improve programming skills, and gain real-world experience in software development.
Seeking a Backend Developer Intern position specializing in ASP.NET Core and database systems.

EDUCATION

Duy Tan University 2023 - 2027

Software Engineer

GPA 3.25/4
Relevant coursework:

- Data Structures & Algorithms
- Database Systems
- Web Development

RESEARCH EXPERIENCE

MindConnect – Depression Detection Social Network -

Role: Independent Researcher & Developer
Student research symposium on Information Technology

- Independently conducted research on detecting depression signals from user-generated text
- Designed and developed a cross-platform system including:
- Web application using ASP.NET Core
- Mobile application using ReactNative to Android and IOS
- Built a unified backend system to support both platforms simultaneously
- Trained machine learning models using Python for text classification and sentiment analysis
- Applied NLP techniques to identify depression-related patterns in user content
- Integrated AI services (OpenAI GPT & Google Gemini) for chatbot and mental health support
- Designed RESTful APIs for communication between web and mobile applications
- Implemented authentication, user interaction (posts, comments), and real-time features

Git: ChykenHa/Depression-Detection-Social-Network at master

PROJECTS

Student Progress Management System -

Role: Technical Team Leader & Backend Developer

Tech: ASP.NET Core, Entity Framework Core, SQL Server, Razor Pages

- Led a team of X members to develop a student academic management system
- Designed system architecture and assigned tasks to team members
- Developed core backend features using ASP.NET Core
- Implemented role-based authentication (Admin, Lecturer, Student)
- Built dashboards and academic tracking functionalities
- Designed and managed database using SQL Server and Entity Framework Core

- Reviewed code and ensured overall project quality

ChykenHa/QuanLyTienDoSinhVien

E-commerce Website -

Role: Fullstack Developer

Tech: ASP.NET, SQL Server, Entity Framework, Bootstrap, JavaScript

- Built an online shopping website with core e-commerce functionalities
- Developed features: product management, shopping cart, order processing
- Integrated user authentication and admin management system
- Designed responsive UI using Bootstrap
- Managed database operations with SQL Server and ORM (Entity Framework)

ChykenHa/Ecommerce: Ecommerce website with ASP.NET

Movie Android Application -

Role: Mobile Developer

Tech: Java, Kotlin, Android Studio, Retrofit, MVVM

- Developed an Android application for browsing and searching movies
- Implemented features: movie listing, search, and detailed information display
- Applied MVVM architecture for better code structure
- Integrated APIs using Retrofit for fetching movie data
- Designed responsive UI with Material Design components
- Used LiveData and ViewModel for state management

ChykenHa/MyAndroidAPP: App chiếu phim đơn giản, -java, sql, android studio

SKILLS

Technical Skills:

- Programming: C#, Java, SQL
- Frameworks: ASP.NET Core
- Database: SQL Server, MongoDB
- Tools: Git, Docker, Visual Studio

Soft Skills:

- Teamwork
- Problem-solving
- Time management

CERTIFICATIONS

IELTS - Band 6.5	2023
TOEIC	2026

HONORS & AWARDS

Third Student Project Award- STUDENT RESEARCH SYMPOSIUM ON INFORMATION TECHNOLOGY	2026
